McKesson Patient Care Solutions

Continuity of Care for Patients Discharged from Acute Care
With changing healthcare policies, processing managed care and insurance orders can be challenging. McKesson Patient Care Solutions (MPCS) is a participating provider with Medicare and many Medicaid plans and is a contracted supplier with hundreds of managed care payers.

When patients are discharged from your care, they still may need medical supplies. MPCS is able to provide those supplies and help support continuity of care.

Servicing patients in their home or place of care across all spectrums of healthcare:

Products in the following categories:
- Wound Care
- Urological
- Ostomy
- Tracheostomy
- Diabetic Care
- Incontinence

1 As a result of regulatory changes effective July 1, 2013, McKesson Patient Care Solutions Inc. is not able to provide diabetic care supplies to patients using Medicare Part B benefits.
Benefits of choosing MPCS:

- Insurance experts help verify products and quantities of reimbursable supplies the patient’s health plan will cover.
- When patients are active with a home health agency, MPCS will continue to contact them to help them receive supplies after being discharged from their Medicare Part A episode of stay.
- Product specialists are available to take the order and answer questions about insurance coverage or products.
- WOC Nurse Connect, a program developed by wound, ostomy, continence (WOC) nurses, provides support and education to clinicians regarding product choices and post-discharge patient support.

Patients may be enrolled in the MPCS discharge program via phone or fax. Supporting documentation is needed to show the patient has been discharged. Please contact: Telephone: **855.567.8671**  
Fax: **855.297.3099**

Need to speak directly to a WOC nurse?
